Honorable Legislator Truitt,

Thank you so much for nominating me to attend the NASA High School Aerospace Scholars program. This was a once in a lifetime experience that I will never forget. This was an amazing program where I was able to explore NASA.

The first day we were given the opportunity to listen to Captain John Young speak. This man was important because he participated in the Apollo and Shuttle programs. He was one of the few people that were able to walk on the moon. Due to this program, I was able to understand his view points on the direction of NASA and the objectives that NASA should be going. This same day, we met our teachers and mentors. These are people that have graciously given their time to help us understand what goes on in NASA. Our mentor, Bryan Evans, is in flight dynamics and is an ascent analyst which helped us to understand our job this week by providing information that was critical to understanding some of the information given to us by other teams.

Our team was the Grey Team. Our team was responsible for integrating all of the others teams information into one, unified project. We were responsible for creating the budget, setting the entire mission goals, and determining the crew make up for our mission. On Tuesday and Wednesday we were allowed to tour some of the buildings on the NASA complex. We toured the Neutral Buoyancy Lab where the astronauts were training for their missions and the Mission Control Center for the Shuttle and International Space Station.

Thank you for this incredible opportunity to participate in this program. It was incredibly beneficial to me because it allowed me to investigate areas that I am interested in majoring in, specifically, Aerospace Engineering. Again, thank you for this wonderful opportunity.

Sincerely,

A handwritten signature in cursive script that reads "Brandon Leet".
